PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering - Cyber Security graduate with hands-on experience in SOC operations, network security, threat detection, and security engineering. Proficient in building privacy-preserving security tools, including a browser-level behavioral detection system and a real-time face anti-spoofing system. Strong foundation in TCP/IP, SIEM, Linux/Windows administration, and industry frameworks (NIST, MITRE ATT&CK). Recognized for analytical problem-solving and clear communication under pressure. Seeking an entry-level Cybersecurity Analyst or SOC Analyst role.

TECHNICAL SKILLS

Security Operations & Frameworks: SOC Operations, SIEM, Threat Detection, Incident Response, Log Analysis, DFIR, Vulnerability Assessment, NIST CSF, MITRE ATT&CK, OWASP Top 10. **Networking & Infrastructure:** TCP/IP, DNS, DHCP, Routing & Switching, Firewall & VPN Configuration, Network Hardening, Active Directory. **Compliance & Privacy:** HIPAA Awareness, GDPR Awareness, Privacy-Preserving Design, Data Protection Principles. **Security Tools:** Wazuh, Wireshark, Splunk, Nmap, Nessus, OpenVAS, Burp Suite, Metasploit, Volatility, Kali Linux. **Systems & Programming:** Linux, Windows, Python, Bash, PowerShell, C, SQL, JavaScript.

EXPERIENCE

Cyber Security Intern *Izeon Innovative Pvt. Ltd*

Jun 2024 – Jul 2024

- Operated in a SOC-focused environment, analyzing TCP/IP, Linux, and network protocols to monitor and secure network traffic.
- Participated in incident response simulations, applying SIEM-based threat detection and correlation concepts to assess technology risk under time-sensitive conditions.
- Performed reconnaissance and network scanning using industry-standard tools (Nmap, Wireshark), demonstrating strong analytical problem-solving and clear communication while documenting findings.

PROJECTS

AI-Driven Detection and Prevention of Prompt Poaching Attacks

May 2026

- Led the end-to-end development of a privacy-preserving, browser-level behavioral detection system (Chrome Manifest V3) to identify unauthorized data exfiltration in AI environments.
- Engineered a real-time monitoring framework analyzing network metadata and behavioral indicators using a heuristic risk-scoring algorithm, achieving 80% detection accuracy without inspecting user content

Real-Time Face Spoofing Detection System

Nov 2025

- Spearheaded the development of a lightweight, real-time face anti-spoofing system using classical computer vision and ensemble machine learning to detect presentation attacks.
- Overcame hardware constraints by designing an optimized color space YCrCb & LUV feature extraction pipeline, achieving 92.5% accuracy and 7.3% Equal Error Rate (EER) on CPU-only edge devices.

LiFi-Based Secure Communication Prototype

Apr 2023

- Directed hardware and software integration for a wireless data transmission prototype using Visible Light Communication (VLC), enabling reliable 30 cm data transfer.
- Troubleshoot complex hardware-software interfacing issues and presented the final solution to a panel of experts, securing selection for the SRM Project Expo 2023.

EDUCATION

SRM Institute of Science and Technology

Sep 2022 – May 2026

B.Tech in Computer Science & Engineering - Cyber Security | CGPA: 8.14 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Cisco– Networking Basics | Ethical Hacker | Security Operations Center (SOC)
- IBM SkillsBuild – Cyber Security Fundamentals | IBM Security Learning Academy | Cohesity Cyber Resilience Foundations
- Google Cloud – Strategies for Cloud Security Risk Management
- Red Hat Academy – Program Learner
- GUVI – Python Programming Certificate
- TryHackMe – Pre-Security | Web Fundamentals (Legacy) | CompTIA PenTest+ | Advent of Cyber 2025 (Solved hands-on CTF challenges in web security, networking, and cryptography)
- Workshops – DevOps Workshop at SRM Institute of Science & Technology, Tiruchirappalli

PUBLICATIONS

Enhancing Breast Cancer Prediction Accuracy: A Comparative Study of Linear Regression Models with Feature Scaling Techniques – Presented at the 4th International Conference on Mathematical Modeling & Computational Science (ICMMCS 2025), Pattaya, Thailand (January 2025).
